

***Making Voices Count works with city decision makers to create a city for all. It is driven by residents, the Coalition of Community Health and Resource Centres, City for All Women Initiative, and community partners. Making Voices Count builds on the momentum of the previous Making Votes Count project.***

# Identify Issues that Matter

- Affordable Transit - Low-Income Transit Pass
- Social Infrastructure:

**All our community resources combined including the organizations, services, people and networks that support our community.**

- Democracy:

**People from all backgrounds and incomes have an important voice and perspective on City issues. When their needs and lived experiences are understood, valued and included, this will help elected officials make better and informed decisions.**

# Bring Together Residents and Community Partners

# Build on Our Lived Experience and Learn More about the Issues

# Raise the Issues with the Elected Officials (the Mayor and Councillors)

## - Making Your Voices Count

# Have Fun and Celebrate
